```
import RPI.GPIO as IO  #importing pin in the name as IO
import time             #import time for using delays
IO.setmode(IO,BCM)
IO.setup(14,IO.OUT)     #set pin 14 as output
while True             #loop condition for periodic blinking
    IO.OUTPUT(14,1)     # 1 second delay
    time.sleep(1)
    IO.OUTPUT(14,1)
    time.sleep(1)
```
